

AYAN BANERJEE

Software Engineer | MERN Stack | Java | Full-Stack Development

+91 62913 72585 | banerjeeayan444@gmail.com | Kolkata, West Bengal | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate and full-stack software developer with hands-on internship experience across the full software development lifecycle — requirements, design, coding, debugging, testing, and deployment. Comfortable collaborating with cross-functional teams to analyze systems and deliver quality, performance-tested solutions in Agile/Scrum sprint cycles. Maintains clear technical documentation and stays current with modern frameworks and development practices. Strong quantitative and analytical problem-solving foundation from coursework in Java, algorithms, and database systems, paired with production experience in JavaScript (ES6+), React.js, and Node.js/Express.

TECHNICAL SKILLS

- Languages: JavaScript (ES6+), Java
- Fundamentals: OOP, Data Structures & Algorithms, Software Development Life Cycle
- Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3, Responsive Design
- Backend & APIs: Node.js, Express.js, RESTful API Design, JWT Authentication/Authorization
- Databases: MongoDB (NoSQL), SQL, MySQL
- Version Control & Practices: Git, GitHub, GitLab, Agile/Sprint Workflows, Code Review, Debugging & Testing
- Tools: VS Code, Render (deployment)

WORK EXPERIENCE

Web Development Intern — Vylex.ai

Dec 2025 – May 2026

Technology Startup | Remote

- Collaborated with product and engineering teams to establish requirements and deliver UI components across weekly Agile sprint cycles.
- Completed full engineering cycles on frontend features — coding, debugging, testing, and deployment — within a live production codebase.
- Reviewed and evaluated proposed changes through peer code review, applying Git best practices (feature branching, pull requests) to maintain quality and consistency across the team.
- Analyzed and resolved frontend defects surfaced during sprint testing, improving software stability and performance ahead of releases.

PROJECTS

PackVerse — Full-Stack E-Commerce Platform

Ongoing

React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT

- Designed and developed a full-stack application end-to-end, from requirements through coding, testing, and deployment, including a responsive landing page, product catalogue, and cart UI.
- Implemented JWT-based authentication with secure password hashing for signup, login, and protected routes across frontend and backend.
- Analyzed data and API requirements to design RESTful services and MongoDB data models for product catalogue and order management.
- Built and tested reusable components with client-side validation and integrated state management for cart and session handling.

Employee Management System (EMS) [Live Demo:](#)

Completed, Mar 2025

Node.js, Express.js, MongoDB, HTML5, CSS3, JavaScript

- Developed a full-stack CRUD application for employee records, from design through testing and deployment, with a responsive dashboard for listing, adding, and editing entries.
- Architected RESTful backend APIs and persistent MongoDB storage, documenting system design and data flow.
- Applied client-side validation and tested functionality to improve data integrity and reduce invalid submissions.
- Deployed the application on Render, enabling public live-demo access and validating real-world performance.

EDUCATION

B.Tech — Computer Science and Engineering

Sep 2023 – Present

College of Engineering and Management, Kolaghat | MAKAUT University

Diploma — Computer Science and Technology

Mar 2020 – Jul 2023

Santiniketan Institute of Polytechnic | WBSCTE | CGPA: 8.32
