

AYAN BANERJEE

MERN Stack Developer | Full-Stack Web Developer

+91 62913 72585 | banerjeeayan444@gmail.com | Kolkata, West Bengal | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate and MERN Stack Developer with hands-on internship experience building responsive React.js interfaces and RESTful Node.js/Express APIs in a live production startup environment. Skilled in JWT authentication, MongoDB data modeling, and Git-based collaborative workflows. Strong problem-solving foundation in Java and JavaScript (ES6+), with a passion for designing scalable, secure full-stack applications and shipping features in agile sprint cycles.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java.

Frontend: HTML5, CSS3, React.js, Tailwind CSS, Responsive Design, Compatibility.

Backend: Node.js, Express.js, REST API Design, JWT Authentication/Authorization.

Database: MongoDB, SQL, My SQL (coursework).

Frameworks: React.js, Express.js, Tailwind CSS, Next.js.

Tools & Version Control: Git, GitHub, GitLab, VS Code, Agile/Sprint Workflows.

WORK EXPERIENCE

Web Development Intern — Vylex.ai

Dec 2025 – May 2026

Technology Startup | Remote

- Built and maintained responsive, cross-device frontend features using HTML5, CSS3, JavaScript, and React.js, contributing to a live production codebase.
- Collaborated with product and engineering teams in an agile environment, delivering UI components across weekly sprint cycles to meet release deadlines.
- Participated in peer code reviews and enforced Git best practices (feature branching, pull requests) to maintain code quality across the team.
- Debugged and resolved frontend issues reported during sprint testing, improving UI stability ahead of releases.

PROJECTS

PackVerse — Full-Stack Bag E-Commerce Platform (Ongoing)

React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT

- Architected a full-stack e-commerce application with responsive landing page, product catalogue, and cart UI using React.js and Tailwind CSS.
- Implemented JWT-based authentication with secure password hashing for user signup, login, and protected routes across frontend and backend.
- Designed RESTful APIs with Node.js and Express.js, using MongoDB for product catalogue and order management.
- Built reusable React components with client-side form validation and integrated state management for cart and session handling.

Employee Management System (EMS) (Completed, Mar 2025) | [Link](#)

Node.js, Express.js, MongoDB, HTML5, CSS3, JavaScript

- Developed a full-stack CRUD application for employee records with a responsive dashboard for listing, adding, and editing entries.
- Architected RESTful backend APIs with Node.js and Express.js, using MongoDB for persistent data storage.
- Applied client-side form validation to improve data integrity and reduce invalid submissions.
- Deployed the application on Render, enabling public live-demo access for end users.

ACHIEVEMENTS

- Successfully completed the Google Cloud Arcade program, earning multiple Google Cloud Skill Badges and receiving official Google Cloud Arcade goodies for completing eligible challenge milestones.

EDUCATION

B.Tech - Computer Science and Engineering

Sep 2023 – July 2026

College of Engineering and Management, Kolaghat | MAKAUT University | CGPA: 7.1

Diploma - Computer Science and Technology

Mar 2020 – Jul 2023

Santiniketan Institute of Polytechnic | WBSCTE | CGPA: 8.3
